EXPERIENCE

CareRev   Los Angeles, CA
Senior Software Engineer   04/2018 – 09/2024

- Maintained and evolved the core API hub, building product features and optimizing database queries, API performance, and background job processing to improve scalability and reliability.
- Engineered a real-time Salesforce integration with Kafka and Debezium, giving sales and marketing live data access and sharper pipeline visibility, which increased the volume of professional credentials processed by 28%.
- Collaborated on a "shift cascading" project, designing algorithms to optimize how professionals are prioritized and matched to nursing shifts, boosting fulfilment rates at implemented facilities and improving staff quality.
- Rotated across product teams as a technical lead, driving development in credentialing, scheduling, billing, and communications to accelerate delivery and strengthen system reliability.

Southern Networx   Atlanta, GA
Software Developer   04/2017 – 03/2018

- Built a Rails-based financial and internal workflow management platform to streamline donation processing and staffing needs for non-profit organizations
- Architected database structures and implemented secure authentication, payment processing, and third-party API integrations
- Designed and applied UI wireframes that utilize collected data to produce data visualizations on financial growth and donor demographics

SKILLS

Languages & Frameworks:	Ruby/Rails, JavaScript, Python
Frontend & UI:	React, TypeScript, Nextjs, Node, Express, jQuery, HTML/CSS
Databases & Data Streaming:	PostgreSQL, MySQL, ActiveRecord, Redis, Kafka, Debezium
Cloud & Infrastructure:	AWS (S3, Lambda), Docker, Heroku, Salesforce
Languages:	Cantonese, Mandarin/Chinese, Japanese

PROJECTS

- **Henro.org**: A React/Next.js application with user authentication, an interactive map interface, Google Maps API integration, and planning widgets supported by custom algorithms for distance, elevation, and route visualization.
- **CharityBlend**: An integrated platform on Rails for nonprofits to manage facets of their business and charitable operations with ease, utilizing the Stripe API and customized internal analytics tools.
