EXPERIENCE

CareRev – Los Angeles, CA   April 2018 – Present
Associate Engineer
- Develop and maintain a backend API and frontend frameworks to provide app-based healthcare staffing solutions
- Bridge application logic between frameworks by supplying robust RESTful responses and supporting data integrity
- Collaborate with team members to diagnose inconsistencies and enhance the performance of existing data queries
- Optimize scalability and unit costs by improving database architecture and automating internal processes

Southern Networx – Atlanta, GA   April 2017 – March 2018
Developer
- Built a Rails-based non-profit management platform to streamline donation processes and timesheets for staff
- Architected database structures and implemented authentication, payment processing, and API integrations
- Designed and applied UI wireframes and SaaS blueprints directed toward meeting strategic business objectives
- Collaborated with designers and marketing personnel to generate necessary collateral and optimize inbounds

Hogan Lovells – Hong Kong   July 2015 – August 2015
Summer Intern
- Analyzed anti-trust legislation and enforcement in the United States, the European Union, and Hong Kong
- Briefed cases on financial and employment law areas such as securities, insider trading, and restrictive covenants
- Drafted legal memoranda on corporate debt and dissolution under Hong Kong law
