EXPERIENCE

Southern Networx – Atlanta, GA   April 2017 – March 2018
Developer
- Build a Rails-based non-profit management platform: back-end data infrastructure, security, payment processing, API integrations, and front-end design
- Devise and present wireframes and SaaS blueprints directed toward meeting strategic business objectives
- Liaise with key partners and stakeholders to inform product direction
- Collaborate with designers and marketing personnel to generate necessary collateral and optimize inbounds
- Revise and draft sales contracts, user terms, and privacy agreements

Fordham University School of Law – New York, NY   February 2016 – May 2016
Research Assistant
- Researched and analyzed case law, legislative history, and secondary sources on online privacy and security
- Cross-referenced case law materials from different sources to prepare for articles and presentations
- Edited drafts and citations of legal journal articles on online defamation and judicial austerity

Hogan Lovells – Hong Kong   July 2015 – August 2015
Summer Intern
- Analyzed and compared anti-trust law and enforcement in the United States, the European Union, and Hong Kong
- Briefed cases on financial and employment law areas such as securities, insider trading, and restrictive covenants
- Drafted legal memoranda regarding civil and criminal issues under Hong Kong law
